WEEKLY PROJECT REPORT

Project Title: AI-Based GST Compliance Helper for MSMEs using OCR and Automated Reconciliation
Role: Developer Lead
Week: 2
Name: Abhishek
SRN: R23EF010
Date: 27/03/2026

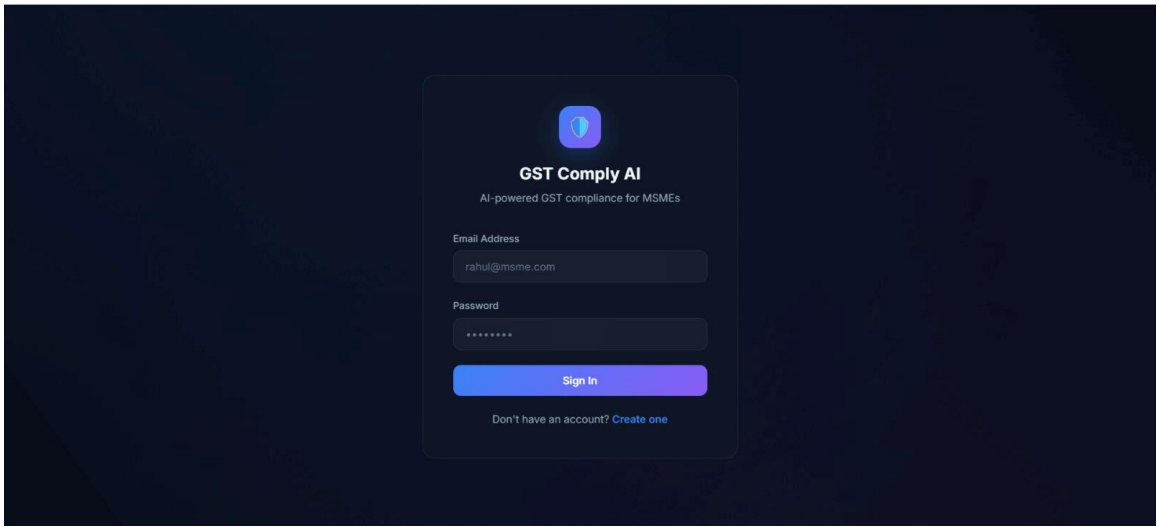
1. Objectives for the Week

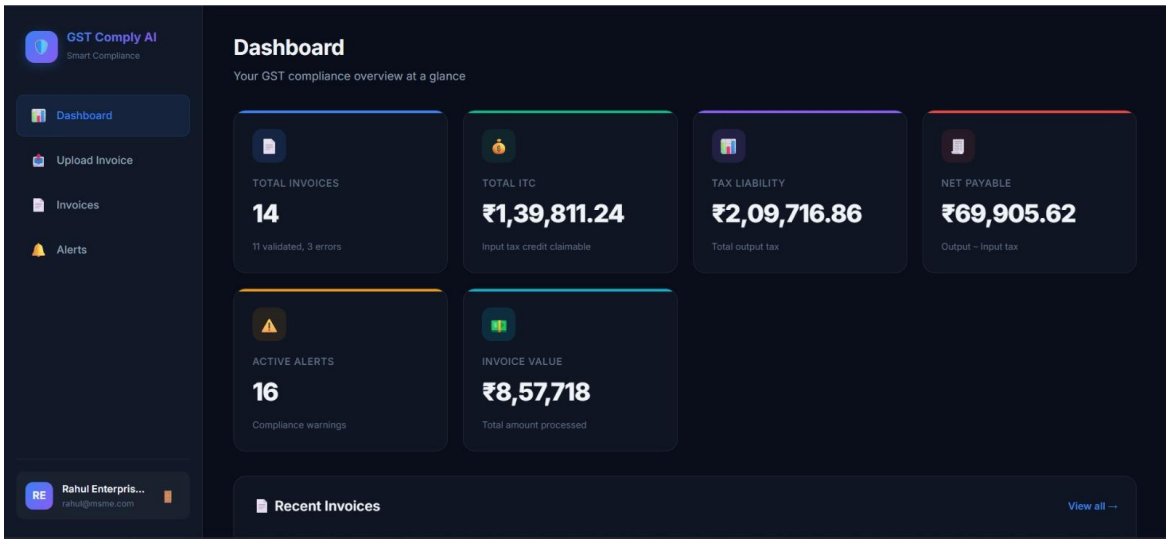
- To understand the finalized technology stack and assist in implementation
- To develop frontend modules and integrate them with backend APIs
- To work on OCR-based invoice upload and data extraction features

2. Activities Performed

- Worked with the finalized technology stack:
  Frontend: HTML, CSS, JavaScript
  Backend: Python (Flask/FastAPI)
  Database: SQLite
  OCR: pytesseract
  Image Processing: Pillow / OpenCV
  Data Extraction: Regex

- Developed frontend components (Dashboard, Upload, Results)
- Implemented invoice upload and API integration
- Displayed extracted invoice data
- Assisted in OCR testing and debugging





3. Key Design Decisions

- Simple UI for MSMEs
- Lightweight frontend
- Regex-based extraction
- Smooth frontend-backend communication

4. Contribution to Project Development

- Developed frontend modules
- Implemented upload and display
- Integrated OCR output
- Supported backend integration

5. Challenges Faced

- Handling OCR inconsistencies
- Extracting correct fields
- Managing missing data
- UI display issues

6. Learning Outcomes

- Learned frontend-backend integration
- Gained OCR experience
- Improved JavaScript and debugging skills

7. Plan for Next Week

- Improve OCR accuracy
- Enhance UI
- Integrate chatbot
- Improve reconciliation display

8. Conclusion

This week focused on frontend implementation and integration with backend. The system can now upload invoices, extract data, and display results.
