WEEKLY PROJECT REPORT

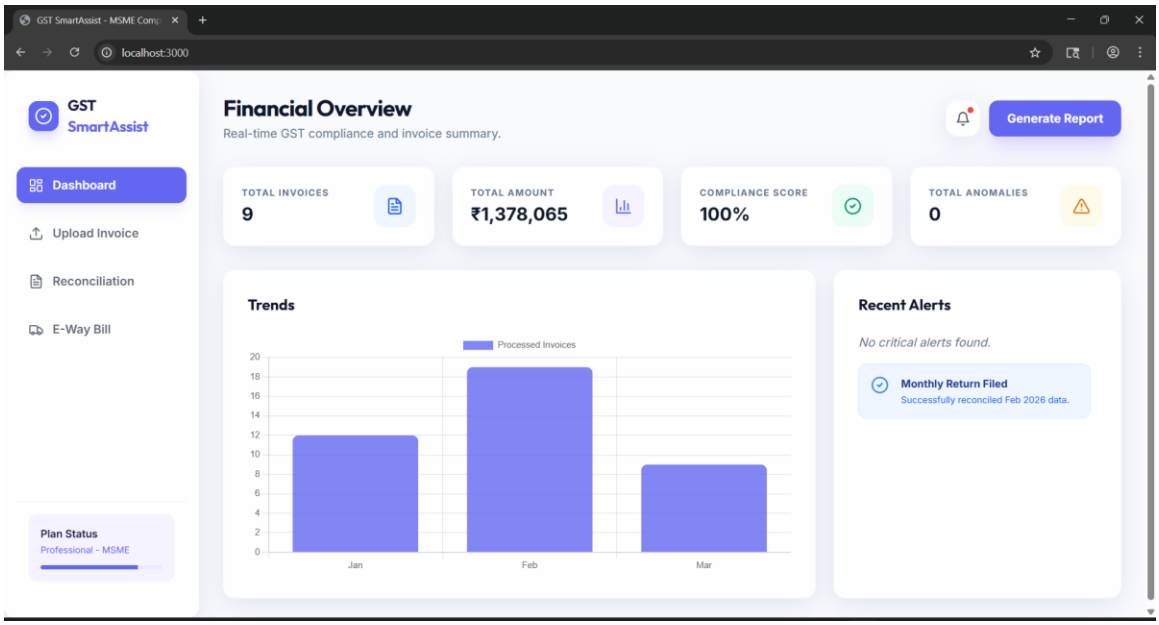
Project Title: AI-Based GST Compliance Helper for MSMEs using OCR and Automated Reconciliation
Role: Software Developer & Survey Support
Week: 1
Name: Bhoomika
Date: 20-03-2026

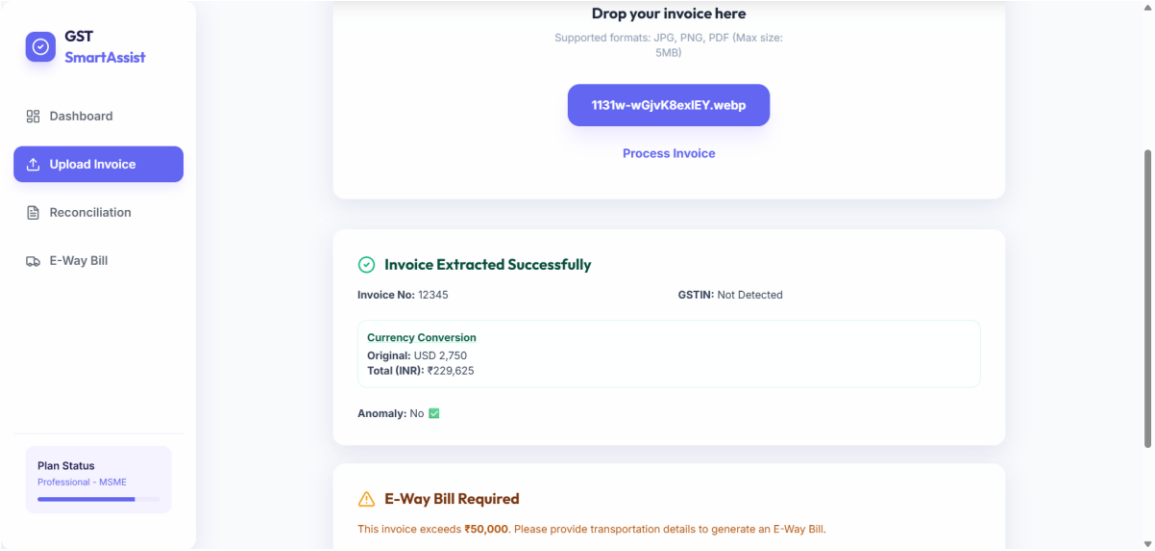
1. Objectives for the Week

- To understand GST-related challenges faced by MSMEs through customer interaction
- To assist the team in collecting real-world requirements
- To begin development of the software system for GST compliance

2. Activities Performed

- Participated with the team during interaction with small business owners and accountants
- Assisted in conducting surveys and understanding user problems
- Observed invoice handling methods, GST errors, and reconciliation issues
- Started software development including UI design, invoice upload, OCR integration, and backend logic





3. Key Findings / Insights

- MSMEs rely heavily on manual processes leading to errors
- GST reconciliation is complex and time-consuming
- Need for automation and simple systems

4. Contribution to Project Development

- Assisted in gathering requirements
- Developed software modules: Upload, OCR, Dashboard, Reconciliation
- Improved UI and usability

5. Learning Outcomes

- Understood GST workflow
- Learned OCR and web development
- Improved problem-solving skills

6. Plan for Next Week

- Improve OCR accuracy
- Enhance reconciliation
- Add chatbot
- Improve UI

7. Conclusion

This week combined customer interaction and software development to build a practical GST compliance solution.
