WEEKLY PROJECT REPORT

Project Title: AI-Based GST Compliance Helper for MSMEs using OCR and Automated Reconciliation

Week: 3

Name: Ankitha N

SRN: R23EF025

1. Objectives for the Week

- To design test cases for the OCR module
- To validate the accuracy of invoice data extraction
- To identify defects in extracted GST-related information

2. Activities Performed

- Designed test cases for validating OCR-based invoice processing
- Tested extraction of GSTIN, invoice number, date, and amount
- Used different invoice samples including low-quality images
- Verified OCR output with actual invoice data
- Logged defects and coordinated with development team

3. Key Findings / Insights

- OCR accuracy depends on image quality
- Numeric fields are prone to errors
- Invoice formats vary widely
- Preprocessing improves accuracy

4. Contribution to Project Development

- Created test cases
- Reported defects
- Improved system accuracy through feedback

5. Learning Outcomes

- Learned OCR testing
- Improved test case design skills

- Understood GST invoice structure

6. Plan for Next Week

- Test reconciliation module
- Validate matching logic
- Perform integration testing

7. Conclusion

- Focused on OCR testing and improving data extraction accuracy
